FOR IMMEDIATE RELEASE

COMPU-QUOTE TO DEPLOY THE eValue-MCV™ COST ENGINE IN CANADA

e2Value, Inc. is pleased to announce it has reached an agreement with Compu-Quote Inc. to deploy and provide access to the eValue-MCV™ cost engine and methodology. Beginning in September of this year, Compu-Quote will distribute the ezITV™ insurance to value (ITV) application, to Insurance Brokers across Canada. The ezITV, a desktop tool, integrated with Compu-Quote's PropertyRater™ application, will access the eValue-MCV cost engine to calculate residential replacement cost valuations.

Biff Moriarty, Vice President e2Value Inc., says "We are pleased to work with Compu-Quote, Canada's largest comparative rating provider, to deliver accurate and consistent valuations using our eValue-MCV cost engine and methodology through the ezITV application to brokers across Canada."

James Nickelo, Senior Vice-President, Compu-Quote Inc. says, "ezITV represents a collaborative effort between Compu-Quote, e2Value and various Insurance Broker Associations. It provides a solution that is designed to meet the needs of our broker customers. ezITV provides the broker a desktop application that utilizes a proven and widely accepted valuation engine, the eValue-MCV cost engine, while preserving a familiar and consistent workflow."

###

About the eValue-MCV Cost Engine

The eValue-MCV cost engine provides a user friendly, standardized approach that delivers consistent and accurate valuation results. The engine is powered by exclusive access to the most current cost data gathered by RS Means cost engineers from thousands of local sources across all of Canada.

About ezITV

ezITV is a competitively priced, easy-to-use Windows based ITV application that is designed to provide industry accepted residential replacement cost valuations across Canada. It accesses the eValue-MCV cost engine via a web service connection and provides a local database for the storage and access of the valuations. ezITV is integrated with Compu-Quote's PropertyRater application and all brokers using Compu-Quote's PropertyRater can utilize the tool.

About e2Value, Inc.

Headquartered in Stamford, Connecticut, and with Canadian operations in Toronto, e2Value delivers ITV and workflow solutions that contribute to the profitable operations of its customers. e2Value's strategic partner, RSMeans, is the leading source of construction cost data for contractors, engineers and architects throughout North America. With an unsurpassed construction cost database, RSMeans complements e2Value's insurance industry expertise and technological superiority, enhancing the valuation solutions offerings available to the insurance industry today.

About Compu-Quote Inc:
